

Excellent quality, fast implementation

★★★★★ Reviewed on 14/5/20 by [Liza Buckley](#)

Role: Art Director at Lunifera.ru

We've been working on a project with Umbrella IT for 6 months. Our goal was to analyse our website, tune it up on both Desktop and Mobile versions. We needed to improve loading speed, update our UX and UI also eliminate major bugs which were caused due to originally bad coding. As a result, we've succeeded to improve loading on Desktop for up to 60% and Mobile around 40. We finally left certain bugs in the past and our customers got better experience using the site. Our manager at Umbrella It helped us to find most suitable solutions and organised the whole work flow. Their summary and report system is excellent. Highly recommend Umbrella Team! Liza, Art Director at Lunifera.ru.
